SUMMARY

Front-End Application Developer with expertise in Flutter and a growing passion for web development using React. Adept at designing and implementing responsive, user-friendly interfaces, I now embrace web technologies to build scalable, dynamic applications. I combine technical proficiency with strong communication and collaboration skills to deliver high-quality software solutions.

EDUCATION

University Of Technology

Bachelor of Science in Computer Science –
Software

2020 – 2024

CERTIFICATIONS

- UniCoding Bootcamp: Full-stack mobile applications using Python & Django and Dart & Flutter

SKILLS

- Programming Languages & Frameworks:
 - Dart, Flutter, C++, Python, ReactJS
- Web Development:
 - HTML, CSS, JavaScript, Axios, Zustand
- Database Management:
 - MySQL, SQLite, MongoDB
- Tools & Technologies:
 - Git, GitHub, Visual Studio Code, Android Studio, REST API integration, Postman
- Soft Skills:
 - Time Management, Team Collaboration, Problem-Solving, Communication

ScopeSky – Front-End Developer (Flutter & React)

11/2024 – Present

- Developed responsive web applications using ReactJS.
- Integrated RESTful APIs with Axios for seamless data communication.
- Designed and implemented interactive user interfaces with engaging visual elements.
- Collaborated with cross-functional teams to enhance web functionality and performance.

Administrative Assistant – Diyala General Company

07/2024 - 11/2024

- Handled administrative tasks, coordinated schedules, and managed internal communications.

Courses:-

- The Complete Dart Development Guide (Udemy)
- The Complete Flutter Development Guide (Udemy)
- C++ (Udemy)
- Databases with Python: MySQL, SQLite & MongoDB (Udemy)
- Learn Flutter and Dart to Create Android and iOS Apps (Udemy)
- Python for Everybody (Coursera)
- Google UX Design (Coursera)

PROJECTS

Web Development Projects

- **Office Management System (OMS)**
 - **Overview:**
 - A comprehensive web application designed to streamline office operations and improve administrative efficiency. The OMS offers a modern, responsive user interface with role-based access control, enabling seamless management of users, departments, and workflows.
 - **Key Features:**
 - **User & Role Management:** Simplified management of user profiles, permissions, and departmental assignments using a state management solution based on Zustand.
 - **Dynamic Dashboards:** Interactive dashboards and real-time reporting that provide actionable insights and quick access to critical data.
 - **Workflow Automation:** Automated task routing and approval processes that reduce manual intervention and speed up operations.
 - **Data Export & Reporting:** Built-in export functionality to generate Excel and PDF reports for easy data sharing and analysis.
 - **Responsive Design:** Fully responsive UI that adapts to various devices, ensuring consistent user experience on desktops, tablets, and smartphones.
 - **Technologies:**
 - **Frontend:** React, Ant Design
 - **State Management:** Zustand
 - **APIs:** RESTful API integration
 - **Additional Tools:** ExcelJS for exporting reports, SignalR for real-time notifications

- **E-Visa Ticket System**

- **Overview:**

- **Developed a web-based ticket management system to process electronic visa support requests with efficient workflows.**

- **Key Features:**

- **Role-Based Access: Customized views and permissions for different roles (e.g., Residence User, SubAdmin, Admin, Operations).**
 - **Ticket Lifecycle Management: Supports multiple statuses with an interactive timeline for tracking updates.**
 - **Real-Time Notifications: Integrated SignalR for instant updates.**
 - **Search & Export: Advanced search/filter, pagination, and options to export reports to Excel and PDF.**
 - **User Management: Full CRUD operations for managing user accounts.**

- **Technologies: React, Ant Design, Axios, SignalR, ExcelJS, html2pdf.js, and Zustand.**

Mobile Development Projects

- **Healthcare App:** Built a user-friendly mobile app offering health tracking and resource information using Flutter.
- **Expense Tracker:** Developed an application for managing personal finances with budgeting and expense categorization features.
- **Akhbary News App**
 - **Overview:**
 - Developed a modern mobile news application in Flutter that delivers real-time news from various sources using NewsAPI. The app features a sleek, responsive design with custom UI components and engaging shimmer effects to enhance the user experience during data loading.
 - **Key Features:**
 - **Real-Time News Feed:** Aggregates current news via NewsAPI, ensuring users receive up-to-date information.
 - **Responsive & Modern UI:** Built with Flutter's widget system to support a responsive layout and smooth animations across different devices.
 - **Shimmer Loading Effects:** Implements shimmer animations to improve user perception during network delays.
 - **Category & Source Filtering:** Allows users to easily filter news content based on topics and news sources.
 - **Dynamic Search:** Provides fast and dynamic search capabilities for personalized content discovery.
 - **Technologies:**
 - **Framework:** Flutter
 - **Network Library:** Dio for efficient HTTP communication
 - **API Integration:** NewsAPI for news data
 - **State Management:** (Utilized Flutter's built-in state management with Provider/Riverpod)
